

REINZOSIL Silicone Sealer 200ml Pressurized Container

REINZOSIL is a solvent-free, permanently elastic, fast-hardening silicone sealant for sealing flat surfaces where there is a sealing gap.

This highly elastic universal sealing compound is resistant to mineral oils and numerous synthetic oils, lubricants, petrol, diesel oil, greases, hot and cold water, detergents, sunlight, ozone, and sea water.

Due to its special properties, REINZOSIL is used in the most varied applications, e.g. as FIPG (formed-in-place gasket) for wet assembly. The compound is also used to seal constructional fissures or cracks, and for seals that are subjected to considerable relative movement.

REINZOSIL is suitable for continuous operation in the temperature range between -50 °C and +250 °C (briefly up to 300 °C).
